TECH & COMMS · SPEAKER CONCEPT NOTE · PANEL

Communications for Humanitarian Services

Where Communications Meet Technology

Samuel Jegede PANELIST

DATE	Thursday, 26 November 2026
VENUE	Legacy Hall, Crawford University
YOUR ROLE	Panelist
YOUR SESSION	Communications for Humanitarian Services
LENGTH	the panel runs after the three talks; about 25–30 minutes shared with the other panelist, then audience questions (final timings to be confirmed)
AUDIENCE	Mass Communication students (all levels), with lecturers and alumni
FORMAT	Practitioner-led conversations, a panel, and a live Q&A
PARTNERS	Department of Mass Communication, Crawford University, and the Crawford University Alumni Association

01 About Tech & Comms

Tech & Comms is an initiative of The Comms Boardroom (TCBR) to close the gap between what students are taught about communications and what the profession looks like on the ground. It is not a lecture series. It is a set of honest conversations, led by people currently doing the work, built around three things every Mass Communication student deserves to hear before they graduate: communications in the real world, media intelligence and proving value, and building a personal brand.

02 Why you are on the panel

The three talks cover the profession as it is: the real job, media intelligence, and personal branding. The panel shows students where those skills can take them.

Your angle is range. Through your work in humanitarian communications, you show that a communications training is not one road but a foundation that opens many paths: brand and

corporate work, media, development, advocacy and humanitarian response. Your own journey is the best proof of that.

03 Your angle on the panel

- How you moved into humanitarian communications, and what carried over from your communications training.
- What communications looks like in humanitarian work: communicating with affected communities, donors, partners and the public, often during a crisis.
- Ethical storytelling: dignity, consent and accuracy when sharing people's stories.
- How impact is reported and measured in the sector.
- How students can explore this path now: volunteering, NGOs, campus initiatives.

04 Questions the moderator may ask you

The host moderates. You won't be asked every question; they're here so you can prepare.

1. **OPENING** Tell us about your work. What does communications in humanitarian services involve?
2. **THE PATH** How did you end up here? Was it planned, or did one opportunity lead to another?
3. **TOPIC 01** How is communicating in a humanitarian setting different from brand or corporate communications?
4. **ETHICS** How do you tell people's stories without taking away their dignity?
5. **TOPIC 02** How do you show donors and partners that the communication is working?
6. **THE PATH** Which skills from Mass Communication have been most useful outside traditional media and PR?
7. **TOPIC 03** How has your personal brand or network shaped the opportunities you've had?
8. **CLOSING** For a student who wants their communications career to have social impact, where should they start?

05 What students should leave with

> - A communications degree leads to more fields than students expect.
> - Humanitarian communications needs both skill and ethics.
> - Students can start exploring through volunteering and campus initiatives.

06 Tone and approach

- Speak from your own work. Real examples, real numbers where you can share them, and real mistakes land better than definitions.
- Keep it Nigerian. Show how the work looks here, not only how the textbooks describe it.
- Talk with the students, not at them. Short stories, plain language, and room for questions.
- Leave them with something to do this week, not only something to think about.

07 What we need from you

- A short bio (60–80 words) and a clear headshot, for the programme and our social posts.
- Slides are optional. If you use them, please send them a day before so we can load them on the hall system.
- Your preferred social handles, so we can tag you when we share highlights.
- Any equipment you need (for example, internet access for a live demo).

Thank you for giving your time to the next generation of communicators.
