TECH & COMMS · SPEAKER CONCEPT NOTE · TOPIC 02

Media Monitoring, Evaluation, Intelligence and Social Listening, and AI in Communications

Where Communications Meet Technology

Samuel Ogundeji HOST AND SPEAKER

DATE	Thursday, 26 November 2026
VENUE	Legacy Hall, Crawford University
YOUR ROLE	Host and Speaker
YOUR SESSION	Media Monitoring, Evaluation, Intelligence and Social Listening, and AI in Communications
LENGTH	about 20–25 minutes, followed by questions (final timings to be confirmed)
AUDIENCE	Mass Communication students (all levels), with lecturers and alumni
FORMAT	Practitioner-led conversations, a panel, and a live Q&A
PARTNERS	Department of Mass Communication, Crawford University, and the Crawford University Alumni Association

01 About Tech & Comms

Tech & Comms is an initiative of The Comms Boardroom (TCBR) to close the gap between what students are taught about communications and what the profession looks like on the ground. It is not a lecture series. It is a set of honest conversations, led by people currently doing the work, built around three things every Mass Communication student deserves to hear before they graduate: communications in the real world, media intelligence and proving value, and building a personal brand.

> As host you also open the event, introduce each speaker and panelist, keep time, and run the live Q&A and closing remarks.

02 Why this session matters

Most students never hear in class that media monitoring, evaluation and media intelligence through social listening are already real, active parts of the PR world. Technology isn't a future trend in this industry; it is already here.

Proving the value of communications and PR is one of the biggest conversations in the industry right now, globally, across Africa and in Nigeria. If students never meet media intelligence while they're in school, they can't join that conversation, let alone help solve it. AI is now speeding all of this up, and students need to know where it helps and where human judgement still decides.

03 What we would love you to cover

- The difference between monitoring (what was said), evaluation (what it achieved) and intelligence (what to do next).
- Social listening: hearing conversations about a brand, sector or issue, not only direct mentions.
- Proving value: moving from outputs (coverage, impressions) to outcomes (awareness, trust, behaviour, business results), and why advertising-value equivalents no longer hold up.
- AI in communications: what it already does well (monitoring at scale, sentiment, summaries, first drafts) and where people still matter (context, ethics, judgement, relationships).
- Where the jobs are: analyst, insight and measurement roles, and the skills that lead to them.

04 Suggested flow

1	**Open**	A live or recorded look at how much is said about one brand in a single day.
2	**The three words**	Monitoring, evaluation and intelligence, with one example each.
3	**Proving value**	Outputs vs outcomes, with a simple before-and-after report.
4	**AI and comms**	What it does, what it gets wrong, and how to use it responsibly.
5	**Close**	Three things students can practise this semester.

A suggestion only. Shape it around your own stories.

05 What students should leave with

> - Media intelligence is a real, growing part of PR and an entry point into the profession.
> - Communications value is proven with outcomes, not only with coverage.
> - AI is a tool that rewards people who understand the work, not a replacement for them.

06 Questions students may ask you

- Which monitoring or listening tools can a student try for free?
- Will AI take communications jobs?
- How do you show a client that PR worked?
- Do I need to be good at maths or data to do this?

07 Tone and approach

- Speak from your own work. Real examples, real numbers where you can share them, and real mistakes land better than definitions.
- Keep it Nigerian. Show how the work looks here, not only how the textbooks describe it.
- Talk with the students, not at them. Short stories, plain language, and room for questions.
- Leave them with something to do this week, not only something to think about.

08 What we need from you

- A short bio (60–80 words) and a clear headshot, for the programme and our social posts.
- Slides are optional. If you use them, please send them a day before so we can load them on the hall system.
- Your preferred social handles, so we can tag you when we share highlights.
- Any equipment you need (for example, internet access for a live demo).

Thank you for giving your time to the next generation of communicators.
